Topic

Our workshop is dealing with current protests and protest movements in Ukraine, Russia, and Belarus. During the workshop we will discuss the current research projects and data collection efforts of participants on this topic. Furthermore, we will elaborate on the following questions: How to preserve knowledge about these (public) events and first data about them for future research, and how to share them?

Our idea is to create an online platform for civil society and people doing research on this topic. We will gather data(sets) and present them online (if required with restricted access).

Structure of panels

Each panel consists of two or three presentations. Each presentation should not last for more than 20 minutes. It is the task of the chair to enforce time limits. The idea is that as a result there will be enough time left for questions from the other workshop participants.

The Research Centre for East European Studies

The Research Centre for East European Studies (Forschungsstelle Osteuropa – FSO) is an independent research institute attached to the University of Bremen. It is funded jointly by the Standing Conference of the Ministers of Education and Cultural Affairs and the State of Bremen. Founded during the Cold War in 1982, the FSO today combines two goals: the (re)examination of societies and cultures in the Eastern Bloc and the analysis of the transformation and contemporary developments in the successor states.
